1921

DISTRICT OF COLUMBIA

STREET AND AVENUE GUIDE

AND

DIRECTORY OF HOUSEHOLDERS

Copyright 1921, by R. L. Polk & Co.

The street system of the District of Columbia is divided into four sections—N. E. N. W., S. E. and S. W., from the Capitol as the center. The numerical streets extend North and South, the streets named after the letters of the alphabet extend East and West, and the broad avenues named after the states intersect the streets from various directions. The house numbers begin with No. 1 at the dividing streets—N. Capitol, E. Capitol, S. Capitol and the "Mall," a public park lying west of the Capitol, and one hundred numbers are allowed to each block.

In the following list the streets are arranged in alphabetical order without regard to geographical situation, the intersecting streets being shown at exact intersection. The number of each building on the street is given in numerical order, and opposite the number is placed name of the occupant householder. In the business blocks containing offices, the occupants of each room is shown by numbers where practicable. In some of the outlying districts the street numbers are incorrect, the houses not numbered or so scattered that it was not thought advisable to include the householders directory for such streets in this issue. The name of every inhabited street, however is given with full description. The list includes all alleys, avenues, courts, places, circles, squares, terraces and subdivisions, giving their location as near and concise as possible.

The profession, business, etc., of individuals and firms are only given at their respective places of business; to find the occupation of householders, refer to Alphabetical List of Names.

Every effort has been made to insure accuracy in this issue. If your house does not appear upon its proper street, or if the street upon which you reside does not appear, we will thank you to notify us so that correction will be assured in the next issue.

*Indicates that the number agrees with that on the house, but that it is out of its regular numerical position on street.

A NORTHEAST, from First east Nineteenth. Paved with asphalt to Eighth.
